=====

Pour noter la présence des espèces dans les divisions du quadrillage U.T.M., trois symboles sont utilisés :

données bibliographiques, l'auteur de la carte n'a pas vu le matériel correspondant ; presque toujours : observations antérieures à 1940 ;

captures ou observations antérieures à 1950, publiées ou non, mais certifiées exactes par l'auteur de la carte ;

captures ou observations à partir de 1950 , publiées ou non, mais certifiées exactes par l'auteur de la carte.

CARTES 601 à 680 - Hymenoptera Apoidea Andrenidae, par Jean LECLERCQ

Nomenclature : WARNCKE (Eos, 43, 1967, p. 171 ; Mem.e Est.Mus. Zool. Univ. Coimbra, n° 307, 1968 ; Nachrichtenblatt Bayer. Ent., 19, 1970, p. 28).

Aux sources habituelles du fichier de Gembloux (bibliographie belge; collections de la Faculté des Sciences Agronomiques de Gembloux, de l'Institut royal des Sciences naturelles, de M.J. PETIT, etc...), il faut ajouter des données communiquées par le Fr. V. LEFEBER (Maastricht), l'inventaire de la collection P. MARECHAL (Université de Liège) et, pour le Nord-Ouest de la France, les localités signalées par E.CAVRO (1950). Il faut aussi remercier le Dr. K. WARNCKE (Dachau) qui a pris soin de certaines déterminations.
