Of other kinds of fish the quantity cured, chiefly by smoking or canning amounted after cure to 265,100 cwt. valued at £2,215,219 as against 227,632 cwt. and £1,707,705 in 1955.

Fishing fleet.—The Scottish fishing fleet in 1956 comprised 183 steam trawlers, 10 motor trawlers, 4 steam liners, 2,919 motor vessels and 188 sail vessels, a total of 3,304 vessels compared with 3,458 vessels in 1955.

Fishermen.—The number of Scottish fishermen was 11,702 (of whom 1,540 were crofter fishermen and 1,154 were partially employed in fishing) as against 12,006 (including 1,669 crofter fishermen and 1,162 partially employed) in the previous year.

Explanatory Notes

Expenditure of Fishing Effort

The scope of Table 13 has been widened to give information about the fishing effort in each fishing region together with comparable information for 1955.

Classification of squids

In the tables for 1954 and earlier years, squids have been classified as demersal fish. It was decided in view of the zoological classification of squids as members of the mollusc group that it was more appropriate for statistical purposes to classify them as shell fish. Effect has been given to that decision in the tables for 1955 and 1956.
