## Over ons

In Vlaanderen zijn een aanzienlijk aantal wetenschappers betrokken in verschillende aspecten van het mariene biotechnologisch onderzoek en bestaat er vanuit de bedrijfswereld een grote interesse in mariene biotechnologisch onderzoek en de industriële toepassingen ervan. Toch blijken deze activiteiten niet duidelijk zichtbaar voor de buitenwereld. Het 'Mariene Biotechnologie Platform Vlaanderen' wil daarom de visibiliteit van mariene biotechnologie verhogen zodat dit kan bijdragen tot de algemene erkenning van het onderzoek en kan leiden tot een verbeterde samenwerking en het bevorderen van de interdisciplinariteit.

# Wat is mariene biotechnologie

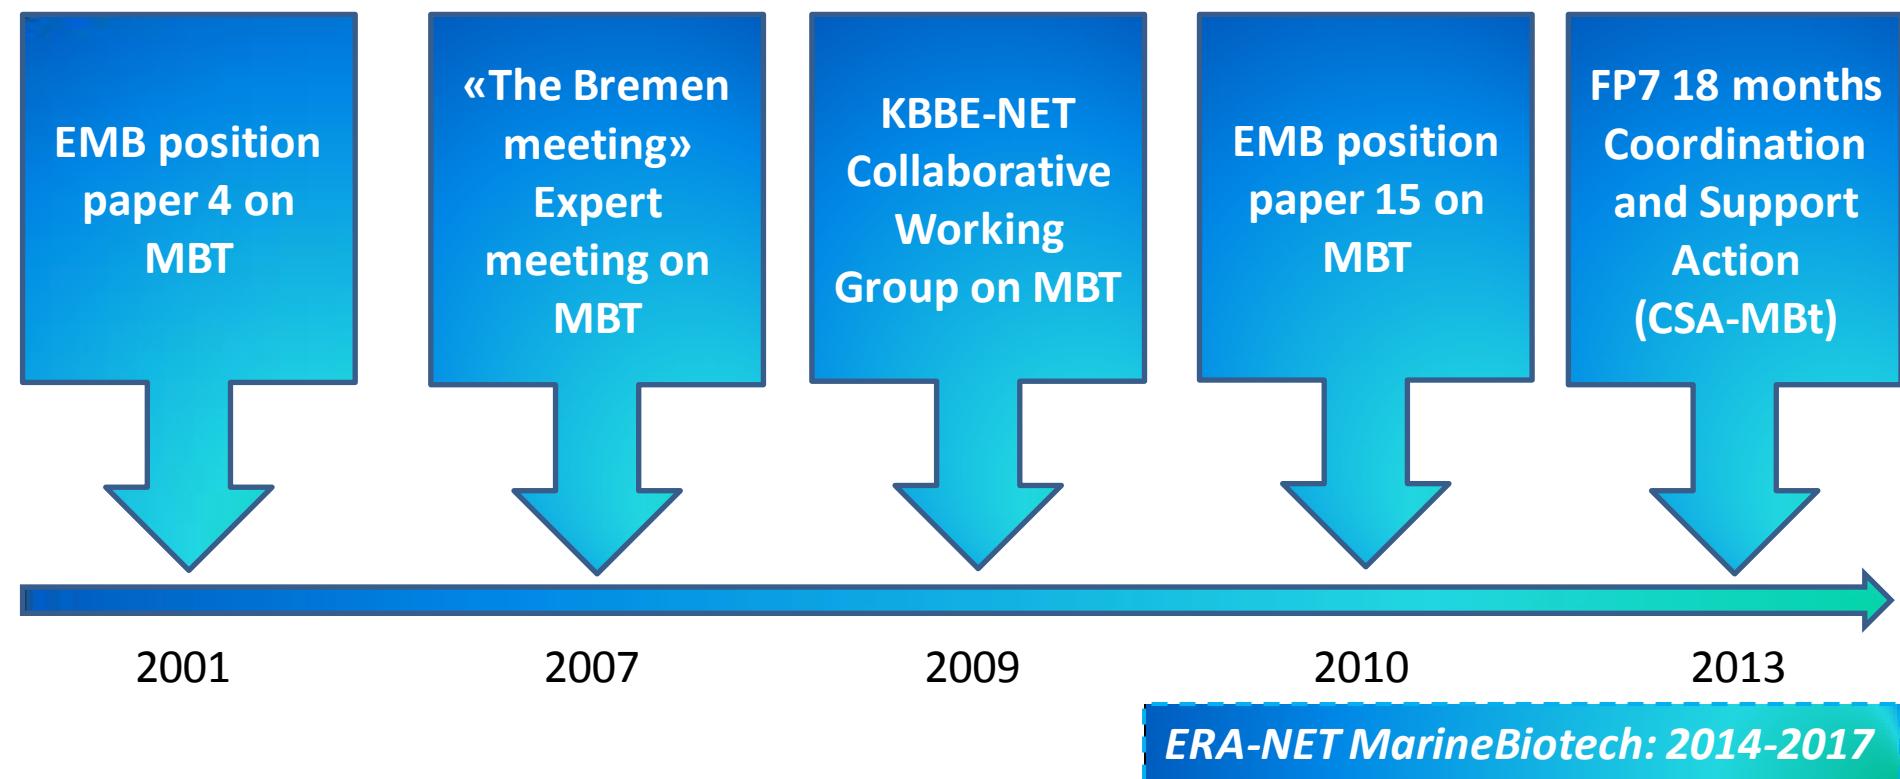

# Waarom een ERA-MarineBiotech?

---

- **Mariene ecosystemen en organismen in Europa zijn:**
  - Weinig bestudeerd en onderbenut
- **De immense biodiversiteit in Europese zeeën en oceanen kunnen bijdragen tot:**
  - Voedselproductie, ecosysteem diensten, innovatieve ontwikkelingen voor maatschappelijk belang (gezondheid, milieu, industriële producten en processen, energie... )
- **Een duurzame ontwikkeling van mariene biotechnologie:**
  - bevordert de kennis over mariene ecosystemen
  - bevordert de ontwikkeling van de bio-economie en de realisatie van het economisch potentieel
  - integreert de maatschappelijke uitdagingen met het wettelijk kader
  - bevordert de aanpak van de Grand Challenges van deze tijd

# Waarom een ERA-MarineBiotech?

Belangrijkste gebeurtenissen voorafgaand aan het Marine Biotechnology ERA-NET:

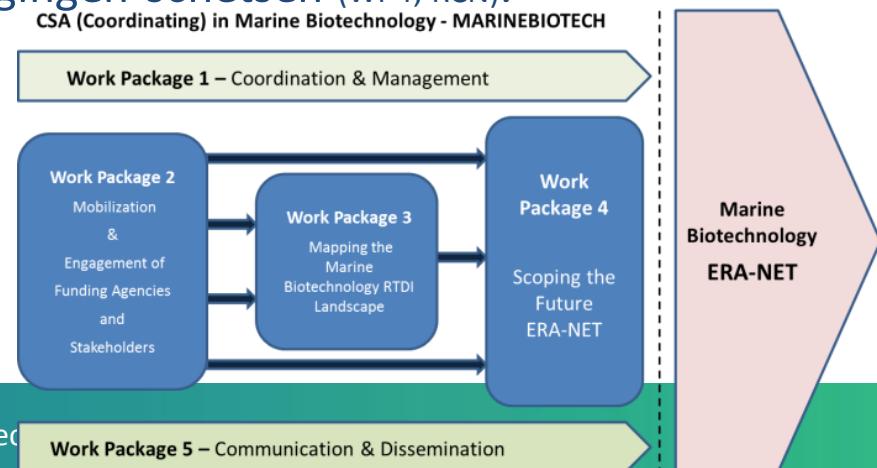

# CSA-MarineBiotech

## Doelstellingen:

- 1. De basis voorbereiden voor een ERA-NET in mariene biotechnologie**
  - Financieringsinstellingen en stakeholders mobiliseren en betrekken in een ‘Strategic Forum’ en een ‘Stakeholder Group’ (WP2, FCT).
  - Uitbreiden van het partnerschap met financieringsinstellingen die zich willen engageren in een ERA-NET in marine biotechnology (WP2/4, FCT/RCN).
  - Het marine biotechnologie landschap in Europa en internationaal in kaart brengen (WP3, ESF-MB).
  - Toekomstige mogelijkheden en uitdagingen schetsen (WP4, RCN).
  
- 2. Het potentieel van mariene biotechnologie en de toegevoegde waarde van een ERA-NET voor een ‘ERA’ communiceren (WP5, VLIZ).**

October 2010 → March 2013

# ERA-MarineBiotech partners

19 partners  
in  
14 landen

[www.marinebiotech.eu](http://www.marinebiotech.eu)

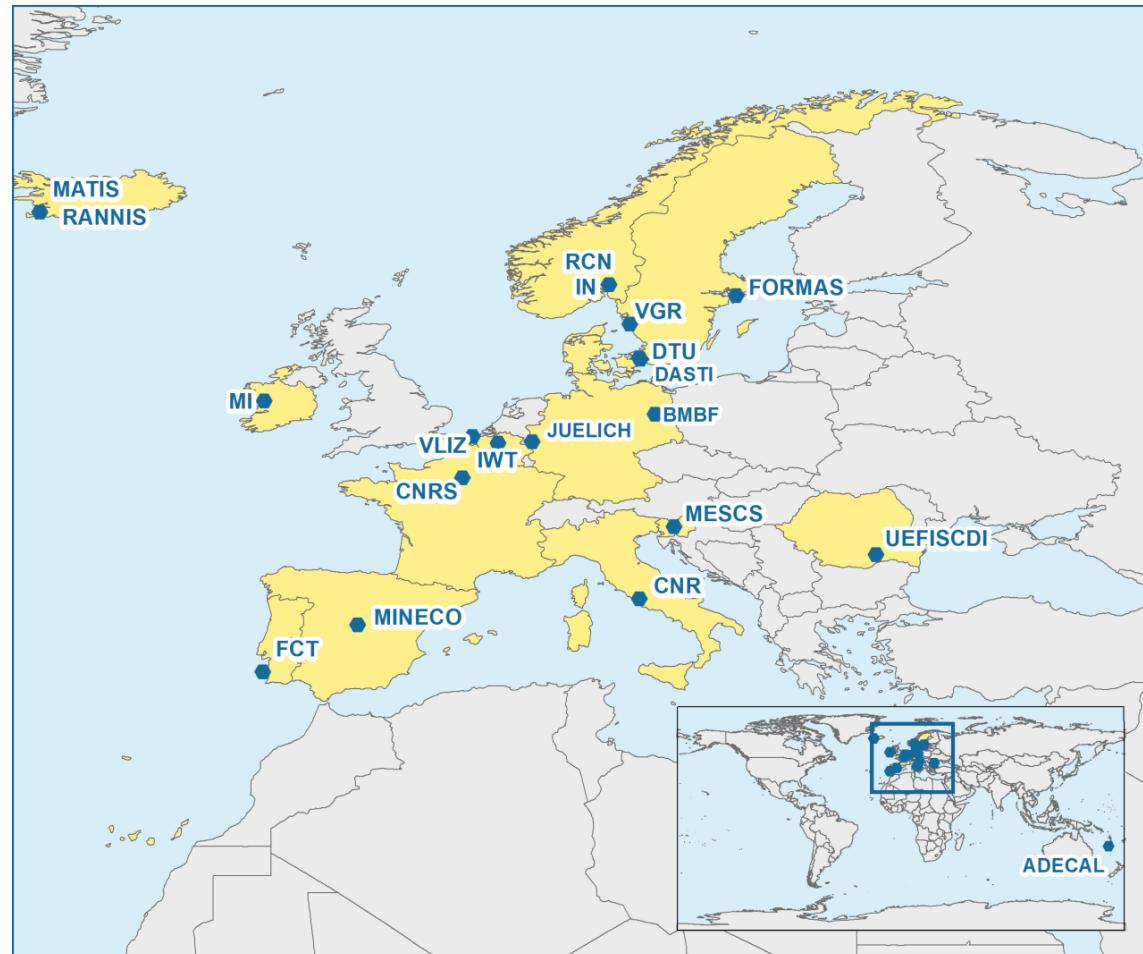

Coordinator  
**Steinar Bergseth**  
Norwegian Research Council

Deputy-Coordinator  
**Torger Børresen**  
Innovation Fund Denmark

Projectsduur:  
**2014-2017**

# Doelstellingen en Structuur

---

- **Duplicatie van onderzoek voorkomen en complementariteit zoeken tussen Europese landen bij lopende en nieuwe inspanningen**
  - Waarde toevoegen aan het 'ERA' door het identificeren van tekortkomingen en uitdagingen voor ontwikkelingen rond mariene biotechnologie
  - Samenwerking bevorderen (intern & extern) en middelen bundelen om gezamelijke financiering van transnationale projecten uit te voeren met verbeterde coördinatie
- **Hindernissen identificeren en valorisatie van mariene biotechnologie stimuleren**
- **Zorgen voor verantwoord onderzoek en innovatie binnen wettelijk kader**
- **Het potentieel van Mariene Biotechnologie communiceren**
  - Het Europese MBT portaal als een unieke vorm van informatie: [www.marinebiotech.eu](http://www.marinebiotech.eu)

# Activiteiten ERA-MarineBiotech

- Organiseren van minstens drie oproepen voor onderzoeksprojecten

- Infopages
- Europe

The screenshot shows the 'Marine Biotechnology ERA-NET' website. The main navigation bar includes links for Home, ERA-MBT, Activities, News & Events, Resources, and Contact. The 'Resources' menu is currently selected. The main content area features a map of Denmark and surrounding regions. A sidebar on the left provides navigation links such as Main Page, Content, Community portal, Recent changes, Random page, Help, Glossary, Featured content, New pages, and Tools. A 'Contents' box lists numbered items from 1 to 9, corresponding to various sections like science strategies, research funding schemes, and major initiatives. A green box at the bottom indicates the page was last updated in July 2015.

The screenshot shows the 'Resources' page of the 'Marine Biotechnology ERA-NET' website. The main navigation bar is identical to the previous screenshot. The 'Resources' menu is selected. The page content includes a brief introduction about the central aims of the ERA-MarineBiotech, mentioning the provision of open-access resources and its role as a long-term living resource for the European marine biotech RTDI community. It also lists several resources under the 'Resources' section: Infopages, General info, Database, Europe, Library, and Beyond Europe. At the bottom, there is a footer with links for Home, ERA-MBT, Activities, News & Events, and Resources, along with a date stamp (19-01-2016) and the URL www.marinebiotech.eu.

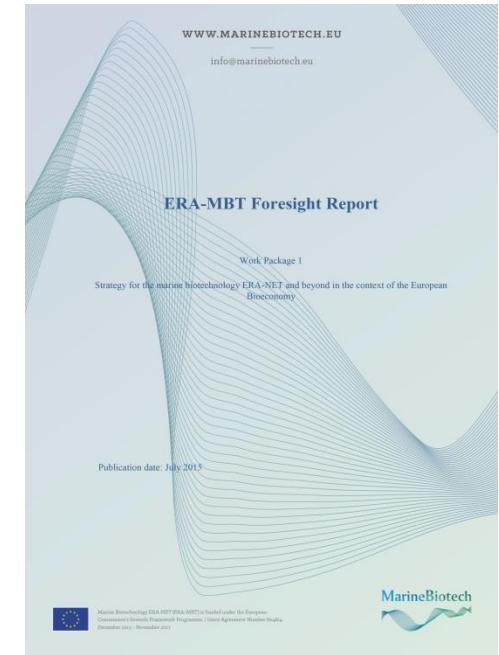

# Activiteiten ERA-MarineBiotech

- Een perspectief ontwikkelen over de toekomst van mariene biotechnologie in Europa

## Preface

*In responding to Europe's strategy for 'blue growth' the marine biotechnology ERA-NET is working with policy, business and research communities on long-range plans to strengthen marine biotechnology capabilities and competencies.*

*This foresight exercise, in this case termed an OUTLOOK process, conducted by the ERA-MBT project highlights future research and innovation areas that need to be addressed to allow European industry to benefit from marine biotechnology. The analysis and vision in this report will help ERA-MBT to continue to expand its influence on marine biotechnology developments.*

# Activiteiten ERA-MarineBiotech

- ‘International Advisory Group’, een expertengroep die vanuit verschillende perspectieven werkt (wetenschap, beleid, industrie)

## *International Advisory Group*

*The International Advisory Group (IAG) will serve as ERA-MBT’s “think-tank” group and as a reference point for all strategic initiatives undertaken by the ERA-MBT consortium. Providing strategic guidance and advice, the IAG will be involved in ERA-MBT over the life-time of the project. The diverse background and experience of the IAG members will be of great importance when providing input to activities such as developing the strategic roadmap, defining research priorities and reviewing ERA-MBT performance, in addition to broader issues associated with the implementation of ERA-MBT.*

# SeaRefinery

The Seaweed Biorefinery – for high value added products

## PROJECT FACTSHEET

CALL 1 | NOVEMBER 2015

## ABSTRACT

SeaRefinery will develop eco-friendly chemical and enzymatic processing technologies to extract and purify high value-added components such as antioxidants, antimicrobial components and hydrocolloids from cultivated seaweed species (e.g. *Saccharina latissima*) in an integrated biorefinery. Bioactive compounds, e.g. phlorotannins, fucoidan, and laminarin, will be selectively tested for bioactivity. In addition, laminarin and marine proteins will be tested in nutraceutical and selected food model systems. Alginic acid will be tested as additive for textile applications via coating and extrusion technologies. In order to maximise the value of the biorefinery feedstock (input) and derived products (output), we will grow monocultures on innovative textile cultivation substrates with high yield biomass production. Seasonal variation, replicated over two years, of the selected biomolecules will be a measuring tool for harvesting the seaweeds with maximum contents of bioactive compounds.

Dr Anne-Belinda Bjerre, Project Coordinator  
Danish Technological Institute  
Denmark

## CONSORTIUM

Name	Organisation	Country
Anne-Belinda Bjerre	Danish Technological Institute	Denmark
Rósa Jónsdóttir	MARINOX EHF	Iceland
Sarah Hotchkiss	CyberColloids Ltd	Ireland
Bert Groenendaal	SIOEN Industries NV	Belgium
Guy Buyle	Centexbel	Belgium
Job Schipper	Hortimare AS	Norway
Jan Alexander Villadsen	ViVoX ApS	Denmark

December 2013 - November 2017

# NEPTUNA

Novel Extraction Processes for mulTiple high-value compoUNDs from selected Algal source materials

## PROJECT FACTSHEET

CALL 1 | NOVEMBER 2015

## ABSTRACT

Novel enzyme-based extraction technologies will be applied to algal biomass derived from selected algal taxonomic groups including macroalgae (seaweeds), microalgae and cyanobacteria. Algal species will be chosen according to their potential to produce high bioactive levels which will be further enhanced by applying abiotic stresses. Algal extracts produced by enzymatic and traditional approaches will be tested for multiple applications, concentrating on antioxidant and antimicrobial activities with applications in food, cosmetics, animal health (aquaculture) and personal/home care. Extracts that exhibit high activities will be chemically characterised to identify active components.

Dr Dagmar Stengel, Project Coordinator  
National University of Ireland Galway  
Ireland

SUBMISSION PLATFORM

COORDINATOR REGISTRATION >

COORDINATOR LOGIN >

PARTNER LOGIN >

...to the submission platform of the second call for transnational research projects within ERA-MarineBiotech (ERA-MBT). Applications for funding within this call can only be submitted through this platform.

If you want to register as a coordinator for a transnational marine biotechnology research project, please read the CALL TEXT and the GUIDELINES FOR APPLICANTS thoroughly. It will ascertain that your planned project fits to the aim of this call. Please, note that some topics may be non-fundable by some funding organisations. Please take a special look on the national regulations in the CALL TEXT (ANNEX II). You can download the CALL TEXT and GUIDELINES FOR APPLICANTS from this page in the left corner below!

Non-coordinating partners of a project will be invited by the respective coordinator to enter their profile data and get access to the automatically generated project fact sheet. For the invitation by the coordinator, the platform creates a password which is sent automatically by email to the partner and which allows access.

Funders get access to the platform by electronic invitation from the call office to do the eligibility check of proposals received from their county.

If you have questions or any technical problems with your login or the platform, please don't hesitate to contact us.

	<a href="#">POST AN OFFER/REQUEST &gt;</a>
	<a href="#">LIST OF OFFERS/REQUESTS &gt;</a>

	<a href="#">CALL DOCUMENTS</a>
	<a href="#">Call text</a>

This partnering tool helps you to find cooperation possibilities within the ERA-MBT calls. It can be used in the following ways:

- Post a Partner Offer/Request

Please post an entry in the partnering tool, if you are looking for collaboration opportunities in project consortia and would like to offer your expertise. You are also welcome to make a post, if you already have a project idea and are looking for further partners that would like to join you/your consortium. Next to providing your contact details, you should give a brief description of your organization. It is important that you provide some key words describing your field of research/innovation and that you specify your interest and the experience, expertise and know-how you/your organization has to offer in relation to one of the listed call (sub)topics of ERA-MBT. Please note: The first call has only one topic!

- Search List of Partner Offers/Requests posted by others

The database can be searched by call topics, keywords and all the other information provided by its users.

Please note:

There will be a plausibility check by the ERA-MBT Joint Call Secretariat for each of your entries. If the information given passes this plausibility check, your request(s) will be published on the page "List of Partner Offers/Requests". Following the publication, all information provided by you will be publicly available.
