## 1. Company profile

ACP is a Belgian-based company with offices in France, the Netherlands, Germany, Poland and Ukraine. With over a century's experience, ACP is the European reference of choice in the field of CO<sub>2</sub>, without a doubt one of the most versatile gases found in nature and used in numerous industrial applications. The most important and best-known application is the carbonation of mineral water, soft drinks and beer. CO<sub>2</sub> is also used for cooling and freezing of foodstuffs, blow molding, transport cooling and industrial cleaning.

For more information about our company and its products, please visit our website [www.acpco2.com](http://www.acpco2.com)

Turnover 2012: 38 mln. €

Employees: >100

## 2. Algae based activities

### 3. Market supply

As a specialist in recycled and purified CO<sub>2</sub>, deliverable in cylinders or in bulk, we can offer support in projects at a company or testing level. We dispose of an R&D- and engineering department that assist our customers in the field of development and engineering. The strategic locations of our purifying stations guarantee a 100% availability of our product.

### 4. Market demand

From a global point of view, we are always interested in new applications and possibilities where the use of CO<sub>2</sub> can play a role in algae projects.
